Critical Thinking, dreaming, code lover, constant investigator. I have experience in 2 StartUps.

Areas of Knowledge

- **CTO** in a marketplace company using **Flutter** and **Laravel.**
- **CTO** in a **fintech** - virtual **wallet** with benefits to customers.
- Full Stack in 3 mobile projects using **Flutter** - **React Native** - **Laravel**
- Developer of many projects carried out in my working life
- Constant study of new technologies

Professional Experience

[Rantiy Marketplace](#) - CTO (May 2020 - Present)

Responsible for creating and maintaining the company system. API REST made in Laravel together with MySQL instantiated on a Linux server with Ngnix. Unit tests to endpoints with PHPUnit and CI / CD with Gitlab. Mobile application developed in Flutter using Provider as state manager.

Rantiy Fintech Wallet - CTO (March 2019 - March 2020)

Peruvian virtual wallet with benefits for users and customers. Responsible for creating the system using cutting edge technologies.
Being the technological manager of the StartUp pivots, thus creating different applications to meet the goal which is to stop using banks and reach unbanked users in Peru.

- Backend developed in Laravel instantiated on an EC2 with Linux and Nginx.
- Migration from React Native to Flutter to improve the mobile application.
- Research and Implementation of Hyperledger to keep transactions secure.
- Creation of mobile applications for the user and affiliated stores.

[Evolbit](#) - React Native Developer (February 2020 - May 2020)

Develop improvements to the applications in charge, refactoring the code of 2 applications, including the BBVA bank benefits app.

[**Barshow**](#) **- Fullstack developer (October 2018 - July 2019)**
Responsible for creating and maintaining 2 applications developed in React Native and Laravel. Integrate the bartender payment module and collect commissions for the company.

[**Somos Sistemas**](#) **- Fullstack developer (May 2017 - September 2018)**

Developer of more than 20 projects, using technologies such as PHP, Javascript, Laravel, Angular, Vue.js, Ionic, React Native, Native Script, Node.js.

[**Personal projects**](#) **- Developer (all the time)**

We all have dreams, we are human, my dream is to be part of the creation of a great company. My big dream is to help defenseless people.

I have always liked creating things, my passion for programming was born by a video game called World of Warcraft. When I was 14 years old and I went to the internet booths, I watched how people played that game, then I at home (without internet) recreated the games and maps in a tool called Warcraft World Editor.
Years later in a high school they taught me to program, then I realized that since I was a child I already programmed.

I also have a YouTube channel where I teach basic things, unfortunately I could not continue the channel due to lack of time, but my plans are to continue uploading videos teaching my knowledge.
